HILLYARD
The Cleaning Resource®

TRIDENT®

Better Built. Better Equipment.

Better Built. Better Equipment.

Our Trident Brand of equipment starts from the ground up - at a place where intelligent design intersects with innovative technology and exceptional engineering to deliver superior cleaning equipment. Cleaning equipment that lowers your total cost of ownership, reduces your cost to clean and improves cleaning results. It's what you expect out of your equipment investment, and it's what we deliver. We're Hillyard, The Cleaning Resource, since 1907.

Intelligent
Design

Exceptional
Engineering

Innovative
Technology

Protection & Longevity

The outer body surrounds the internal structure and mechanical parts, protecting them from impact and eliminating potential repair costs from scrub decks being exposed outside the body.

Yellow Color-Coded Parts

Parts that should be cleaned daily are color coded in yellow. This saves time and makes sure your scrubber is kept in perfect condition at all times.

Comfort

Ergonomically designed, adjustable padded seat delivers hours of stress-free operation. The operator can position the seat for maximum comfort and safety.

Maximum leg room and a steering wheel that's closer to the operator makes the machine even more comfortable to use.

The foot rest zone is designed to offer ample space for the feet within the compact dimensions of the machine.

The lateral paddles provide greater control over the machine for total peace of mind and a comfortable, safe driving experience.

The lowered footboard facilitates easy access from both sides and allows the operator to sit comfortably.

Ease-Of-Use

Service Light System

LEDs light up the areas that may require operator inspection.

Squeegee Assembly

Battery Compartment

Brush Assembly

Designed to Last a Lifetime

Innovative Aluminum Chassis Components

The R36 Series combines the strength of steel and state-of-the-art aluminum to deliver an under-carriage built for performance. The key aluminum components are corrosion resistant, sturdy and durable, light weight and provide a precision fit.

Performance

Outstanding Traction, Maneuverability and Cleaning

The Hillyard Trident R36 Series is engineered with dual rear-wheel drive while other manufacturers use single front-wheel pull systems. Rear-wheel drive comes with a host of advantages like:

- Battery and tank weight is evenly distributed over the heavy-duty rear axle providing more drive wheel traction.
- Easily climb ramps with an 18% slope.
- Better traction enhances safety and reduces potential for slipping.
- Frees up the dual front-wheel to deliver precise steering to turn and clean in any direction.

Lateral Moving Side Brush

The third brush moves laterally to facilitate cleaning along walls or shelves, increasing productivity by up to 15%.

Start & Stop Technology

When the machine is idle, the brush motor, vacuum motor, traction and detergent pump will turn off automatically, reducing costs and environmental impact. All the functions are reactivated automatically as soon as the operator accelerates.

Adjustable Pressure To Clean

Electronically-controlled pressure setting tackles even the most stubborn soils by applying up to 330 lbs. of brush pressure.

Hydraulic Drum Brakes

Self-adjusting hydraulic drum brakes deliver the best braking performance.

Power Mode For Heavy Soil

Activate the Power Mode to increase the delivery rate of detergent solution, boost brush pressure, and increase vacuum power to tackle heavy duty cleaning. Let Power Mode run for the full length of its 60-second countdown clock, or stop it with a touch at anytime.

Safety

Anti-Collision System

The anti-collision system detects obstacles when reversing, helping the operator work in complete safety and protects the machine.

Emergency Stop

By pressing a single button the machine stops immediately.

LED Lighting

Front and rear LED headlights maximize work safety in all conditions.

Descent Control

Maintains a constant speed and prevents a sudden increase in speed when driving downhill.

Steering Wheel Controls

The steering wheel controls offer the operator even greater control when cleaning. Also improves safety by eliminating distractions and letting the operator keep his or her eyes on the path ahead.

Rear-View Camera

Rear-view camera lets the operator monitor cleaning results in real time from the display, without taking his or her eyes off the direction of travel.

Stop & Go Control

The traction control system, which brakes and holds the machine when the accelerator pedal is released, provides assistance on both uphill and downhill gradients.

One-Touch - Service On Site

One-touch service contact in case of emergency. Pushing the red button will automatically send an e-mail to the authorized Hillyard service department on record so they can quickly act on the request.

Automatic Electro Braking

Automatically operated safety break engages when the machine stops. It acts as a safety parking brake.

ESC - Electronic Stability Control

Automatically reduces speed when turning without the operator using the brake.

Eco Mode For Conservation

The Eco Mode function helps conserve water, detergent and energy by using only the quantities you need and nothing more.

Better Built. Better Equipment.

Simplified Cleaning and Control

The operator is the center of a high-tech universe, where everything is easy and intuitive.

All functions and activities are managed from a single interface, where a mere touch of the finger offers access to an extraordinary choice of customizable features that satisfy all types of requirements with effortless simplicity.

The high-definition color display offers the same intuitive experience as a smartphone.

LOG-IN WITH PASSWORD

Protect your investment and personalize the settings.

CUSTOM WORK ZONE PROGRAMS

One-touch equipment settings for area types or different operators.

ONBOARD DIGITAL INSTRUCTIONS

Giving you all the information you need exactly when you need it.

REAR-VIEW CAMERA

Keep everything under control.

ECO MODE

Sustainable, cost-effective cleaning.

POWER MODE

Maximum power for tough cleaning.

NO TRAINING The integrated video tutorials show how to perform routine maintenance.

Join The Connected Cleaning World*

Keep tabs on your machines remotely whenever you want and from wherever you want!

HFM

Hillyard Fleet Management

GEOLOCATION

Know where your machines are.

USAGE DATA

Know who's using your machine and how it is being used.

MAINTENANCE

Know the health status of machines.

TELEMETRY†

Critical machine data is always being monitored for peak performance.

An authorized Hillyard Trident Service Center can view real-time telemetry data, diagnose systems, and update settings over the internet - keeping your equipment running at peak performance - and minimizing downtime.

* Requires optional Hillyard Fleet Management module and subscription.

† Battery charging information is available on equipment with onboard charging systems.

Knowledge Is Power

Making technology available to improve efficiency is one of the core missions of Hillyard. It gives you the power to make the right decisions for your cleaning program.

HFM, the Hillyard Fleet Management system collects data sent by connected cleaning machines. When the machines are operating, valuable machine information is transmitted and easily accessible in real time, 24/7, from your smartphone.

Being constantly connected to your machines will help you operate them even more efficiently and effectively. Know where your machines are, and if the operation is being carried out according to plans at the scheduled time.

Machine health is constantly monitored. In the unlikely event of a breakdown, you'll receive an alert notification directly on your smartphone, allowing you to promptly take corrective action and immediately call technical support.

The sensors provide hard impact feedback. Now you will know how the equipment is being used.

It's time to get your cleaning world connected with Hillyard Fleet Management.

Sustainable Technologies

TES

Trident Energy Saver

Reduces energy consumption by up to 35%.

LED technology consumes much less - up to 80% less energy - than conventional headlights, offering a longer lifespan and illuminates with a brilliant natural daylight.

TDC

Trident Dosing Control*

Water and detergent are dosed separately, optimizing cleaning and reducing chemical and water consumption by up to 50%.

TFC

Trident Flow Control

Engineered water flow system that delivers equal solution to both scrub brushes ensuring proper coverage to deliver consistent cleaning quality.

Power Options

Maintenance Free

- The ultimate solution for simplicity and durability.
- Virtually maintenance free. Just plug in the charger when not in use.
- Full replacement three-year warranty with use of the included Protection from Overdischarge (POD) device.

Flooded Lead Acid

(Not Available as Factory Installed Option)

- Conventional deep-cycle battery for cleaning equipment.
- High quality, lower-cost alternative to maintenance-free batteries.
- Requires routine maintenance to maintain electrolyte levels and warranty. Pro-rated one-year warranty.

Battery Charger - Lester Summit Series II

Full replacement 3-year warranty

BLUETOOTH®

Featuring Bluetooth wireless communication with apps for Apple® and Android® phones and tablets. View charge cycle status, select the active battery profile, upload new profiles, change between on-board and off-board and download charge history records anytime using just a smart phone or tablet.

PERFORMANCE

Our Summit Series® II provides industry leading charging performance and intelligence. Our proprietary Progressive DV/DT charge algorithm ensures a precisely charged battery every time. The chargers are tested in extreme temperatures and operating conditions and built to last.

EFFICIENCY

Our switch mode (high frequency) chargers have best-in-class efficiency and are compliant with the latest DOE and CEC standards. We operate a CEC approved laboratory in our Lincoln, NE manufacturing plant.
