

ANATOMY HUB

QUESTION

1. The trachea is made of

- a. cartilage
- b. muscle
- c. bone
- d. connective tissue

ANSWER

The trachea is made of cartilage. It is a large, flexible tube that carries air from the lungs to the rest of the body. The cartilage is in the form of rings, which are connected by a layer of connective tissue. This structure allows the trachea to be flexible and to expand and contract as needed.

QUESTION

- a. The trachea is made of cartilage.
- b. The trachea is made of muscle.
- c. The trachea is made of bone.
- d. The trachea is made of connective tissue.

ANSWER

The trachea is made of cartilage.
