

FW1394-6-4 FireWire® Cable

Designed to handle high intensive bandwidth on your network connections.

The CyberPower FW1394-6-4 Firewire® cable (6 feet/1.8 meters, 6-pin to 4-pin, 400 Mbps) connects Firewire digital, video, and audio devices; external drives; or other other self-powered devices. Its 24k gold-plated copper contacts provide excellent conductivity for accurate high-speed transmission of multimedia data.

The FW1394-6-4 cable offers plug-and-play technology and exceeds the latest IEEE 1394 standards for reducing electromagnetic/radio frequency interference (EMI/RFI). Molded construction relieves internal stress at the termination point and provides flex relief at the cable exit.

A Limited Lifetime Warranty ensures that this network management card has passed our highest quality standards in design, assembly, material and workmanship.

Features

- 6 ft. Cable Length
- 6-pin to 4-pin Connector
- 400Mhz Transfer Rate
- Limited Lifetime Warranty
