Mixing Colors

You can use the paints directly from the bottle, or try mixing them to create new colors.

Red, Blue and Yellow are called Primary Colors. When combined, these colors can be used to make Orange, Green and Purple – the secondary colors.

⚠ WARNING:
CHOKING HAZARD - Small parts.
Not for Children under 3 years.

Use this mixing chart and your bowl to create new colors. You may want to add a drop or two of water to make your paint go further.

Mix equal parts of the paint as shown below. You can adjust the amounts as needed to get just the color you want.

Green + Yellow = Light Green

Blue + Yellow = Green

Yellow + Red = Orange

Red + Blue = Purple

Black and White are called neutral colors. To make a color lighter add white. For example, to make pink combine white paint with a few drops of red.

Red + White = Pink

To make a darker color, mix in a little black paint. For example, to make Maroon add a few drops of black paint to the red.

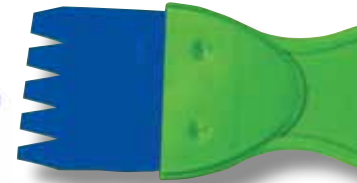

Red + Black = Maroon

Painting with the Texture Brushes

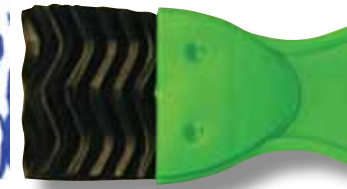

Select a paint color and place it in your bowl. Remember, always clean your bowl and brushes before changing colors.

Each texture brush will give you a different pattern and effect. Try combining different textures and colors.

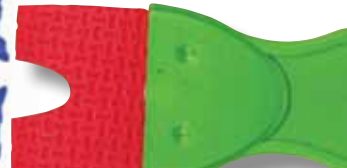

Look at the patterns and tools below. You can change the patterns and effects by pulling, twisting, swirling, dragging, or by changing the angle. Try stamping with your brush straight up and down to create a continuous pattern.
