## LED RECHARGEABLE FOLDING WING LIGHT & STAND

With 2 brightness settings, 2,000 lumens or full 4,000 lumen output, our LED Rechargeable Folding Wing Lights are the brightest fixtures of their class. With the option to run on both battery or 125V power, these fixtures can go wherever you need them most. The internal Samsung® lithium-ion battery lasts for up to 4 hours. These fixtures run using a 15-Amp 125V input, while charging the battery, giving full charge when you need it. When plugged in, the feed-thru feature allows it to be daisy chained to other lights. Our triple panel design allows for 360° directional lighting. Impact resistant construction allows for durability on every jobsite.
