

ANATOMY

Respiratory System	
Trachea	Windpipe
Bronchi	Branches of the trachea
Bronchioles	Smaller branches of the bronchi
Alveoli	Small air sacs where gas exchange occurs
Diaphragm	Muscle that contracts and relaxes to breathe
Pharynx	Part of the throat where food and air pass
Larynx	Voice box
Epiglottis	Flap that prevents food from entering the lungs
Tracheal Cartilage	Rings of cartilage in the trachea
Surfactant	Substance that reduces surface tension in the alveoli
Capillaries	Small blood vessels for gas exchange
