

RUSTIC PLANT GARDEN TRELLIS HMI-777

Review all information before using this product.
Save this manual for future reference.

Location

Select a location with firm soil, sufficient space for the trellis, and the adequate amount of sunlight required for your climbing plants.

Potted Plants: To ensure proper stability, choose a pot that is large enough to support the weight and height of the trellis. The soil must also be firm enough to support the trellis.

Preparation

Clear any debris that may prevent the trellis stakes from being fully pressed into the ground, such as mulch, pine, straw, stones or pavement.

Assembly

Slide the trellis top into the trellis bottom.

Installation

Grip the trellis legs and press the stakes into the soil until the unit is secure. Never press on the trellis with your foot as it may bend or break the unit. If the ground is too hard, slowly saturate the soil with water to help soften it.

General Use & Care

INSTALLATION: Ensure proper stability is obtained when installing the unit.

CLEANING: Use a slightly damp, soft cloth to wipe away dirt and debris.

WINTER CARE & STORAGE: After the growing season has ended, remove the trellis from its growing spot and store in a dry, indoor location to ensure no damage occurs.

Any modification to the product or failure to follow recommended care will void the product warranty.

If you experience issues or the product was damaged during transit, please contact our customer service team through one of the methods mentioned at the top of page 1. Please have the item number and order information ready to expedite response time.

WARNING:

Manufacturer and seller expressly disclaim any and all liability from personal injury, property damage or loss, whether direct or indirect, or incidental, resulting from the incorrect attachment, improper use, inadequate maintenance, or neglect of this product.
