Preparing Base for Install

1

Unfold Load Leg

This is an optional feature.

In a crash, load legs can reduce downward rotation, limit rebound, provide additional stability, and energy absorption.

⚠ **Do not fully extend yet. Do not use the load leg to adjust the base angle.**

Check Base Angle

The angle indicator will turn **completely green** when correct. No red should be showing.
2

Adjusting the Base

If the angle indicator is not correct, adjust the base foot.

There are 3 positions.

- The adjustment handle is at the back of the base.
- Squeeze the adjustment handle to release the base foot.
- Then release the handle so the base foot locks into place.

3 Lift Release Lever

> **For UAS Belt Base Install**
> - You **MUST OPEN THE LOCKOFF** in order for the UAS belts to loosen.

> **For Vehicle Belt Base Install**
> - The lap belt or the lap/shoulder belt both go **completely under** the belt path guides and the Lockoff.

# There are 2 methods for install. Choose only one:

UAS Belts **OR** Vehicle Belts

**When used correctly the UAS belts or the vehicle belts are equally safe.**

⚠ **Do not use both the UAS belts and vehicle belt at the same time.**

Attach Connectors to Vehicle Anchors

5

Push Release Lever Down

You **must Push the Release Lever Down** in order for the UAS belts to tighten.

6

**Push Down on Base to Tighten UAS Belts**

The belts will begin to automatically retract and tighten as you push down.

Check Tightness Indicators

The red will turn **completely green** when tightened correctly. No red should be showing.

> You may need to **adjust the base foot** into another position for the tension indicators to turn completely green.
>
> See **Preparing Base for Install** Step 2 on Page 1.

7

Extend Load Leg

- Squeeze the buttons on the load leg and pull it down until it meets the vehicle floor.
- It **must be** perpendicular to the vehicle floor.

⚠ **Do not** use the load leg if it does not reach the floor of your vehicle. **Do not** use the load leg on top of vehicle storage compartments. Review your vehicle owner's manual.
