

The diagram illustrates the internal structure of a flower. The central part is the ovary, which contains an ovule. The ovary is surrounded by the petals and the outer whorl of sepals. The diagram shows the relative positions of these parts and how they are connected.

TABLETTE

The diagram illustrates the external structure of a flower. The central part is the ovary, which is supported by a stalk. The petals are shown above the ovary. The diagram shows the relative positions of these parts and how they are connected.
