

LIFEPAK® CR2

cellular connected defibrillator

Sudden cardiac arrest (SCA) is a leading cause of death in Australia and New Zealand. Timely response by first responder teams and early intervention by bystanders remains a key factor driving favourable outcomes for victims of SCA. That's why public access defibrillators are so important!

Anyone can use a defibrillator and start CPR to try and save a life of someone in cardiac arrest. But AEDs are only effective if they are easily accessible and ready to be used in a sudden cardiac arrest emergency.

Benefits of a connected AED solution

Reduce risk

Are you prepared? Ensure your AED is ready to be used in an SCA emergency. Self-monitoring AED completes automatic self-tests and displays state of readiness in LIFELINKcentral™ AED program manager. Monitor AED's location if it has been moved, lost or stolen.

Used your device? Remote cellular connectivity enables real-time notifications if AED has been used or requires servicing.

Save time and money

Improve operational efficiency. Automate fleet management tasks by remotely managing expiry dates and replacement needs. Reduce risk of incorrect data entry when manually tracking AEDs. Increase return on investment. Reduce human resources and manual labour time required to manage AED fleet.

Stay secure

All data is stored in Australia. Data is kept secure using a custom-built cloud infrastructure.

Cellular and Wi-Fi connectivity available

Self-monitoring AED tracks readiness on one platform

Get real-time notifications when device is used or requires servicing

Automatically track expiry dates for AED accessories

Track geolocation of AEDs

Enable AED Locator feature to locate AED if it is moved outside of its set diameter

Remotely manage automatic software updates

Tailor LIFELINKcentral AED program manager to suit business needs

In case of an emergency

- 1 Call 000
- 2 Begin CPR until medical treatment arrives
- 3 Use AED and follow verbal or visual prompts*

*An AED will only deliver a shock to a person with a shockable rhythm

Always follow the directions for use
