

the α -tubulin and β -tubulin subunits of microtubules. The α -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The β -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The α -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The β -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004).

Microtubule-binding domain of τ (Mitsudome et al., 2004). The α -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The β -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The α -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The β -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004).

Microtubule-binding domain of τ (Mitsudome et al., 2004). The α -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The β -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The α -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The β -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004).

Microtubule-binding domain of τ (Mitsudome et al., 2004). The α -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The β -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The α -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004). The β -tubulin subunit is the primary target of the microtubule-binding domain of τ (Mitsudome et al., 2004).
