

# Southwire™

## 2-STAGE LED CART LIGHTS

Southwire's 2-Stage Cart Lights uses 5,500-lumen heads, and has both a dual-head and quad-head option. The quad-head option has the added benefit of giving your jobsite either directional or a 360-degree area lighting. Our LED Cart Lights features an all steel mobile cart with a mast that extends to 10 or 12 feet. A 600lb self-braking winch helps you get the height just where you need it (9322 only). At 5,500 lumens per head, sufficient light won't be an issue with this cart by your side. Wire cages are included for additional lens protection. The cart base can accept portable generators for remote applications.

**5,500 LUMENS PER HEAD**
