B	Bowl	1

Inspect packaging to ensure all parts are accounted for before disposing of packing materials.
Save the packing slip.

NOTE: Copper will patina when it is exposed to water and air; this is a natural characteristic of copper and is not cause for return.

CHOOSING A LOCATION

A shaded location is recommended for this bath/feeder; the metal can become very hot in summer sun. Additionally, warm water is less appealing to birds and is more likely to form algae and bacteria.

CLEANING

Feeder: Cleaning twice per month is recommended, more often as traffic increases and immediately if there are signs of mold.

Bath: Cleaning 2-3 times per week is recommended to keep the water clean and to reduce patina.

1. Empty the bowl.
2. Wash components using a mixture of 9 parts water to 1 part white distilled vinegar. Scrub with a cloth or a soft-bristled brush.
3. Thoroughly rinse with clean water.
4. If using this unit as a feeder, ensure the bowl is completely dry before refilling with seed.
