KA11

KA11
11 inch Countertop/On-Wall Touchpanel

The KA11 touchpanel provides simple, intuitive control of the entertainment, environment, security, and related systems in residential or commercial settings. The sleek touchpanel features a fully customizable 11.6" high-definition widescreen display with an integrated capacitive touchscreen for swiping through pages and menus. The innovative KA11 is programmable in landscape or portrait mode and comes equipped with sensors to automatically wake the unit and adjust the screen brightness as a user approaches.

Wall-mount installation is easy using the included wall bracket, while an accessory stand is available for countertop installations. A single Ethernet-connected Cat-5/6 cable can both power the unit and enable control of the RTI ecosystem.

Installation Options

Countertop installation with accessory table stand

On-wall installation uses two-gang wall bracket and adapter

Key Features

- 11.6" widescreen LCD with 1920x1080 Full HD resolution and integrated capacitive touchscreen, supporting multi-touch and gesture.
- Fully customizable interface can be programmed for both portrait and landscape mode installations.
- Design enables wall mount installation in dual gang electrical box and table top installation using stand accessory (sold separately).
- Ambient light and proximity sensor adjusts the screen brightness and LED backlights automatically according to the environmental light level.
- Powered by PoE (Power over Ethernet) or a power supply (sold separately).
- Gigabit Ethernet with PoE enables two-way control via the RTI control system, video from IP security cameras, and remote programming updates.
- KA11-to-door-station support enables answering the door from the touchpanel via the built-in video intercom.
