IN THE BOX

GETTING STARTED

AS A GENERAL GUIDELINE TO START:

- 8-10 repetitions for 2-3 sets when training for strength (moderate to heavy resistance with focus on proper form and control).
- 12-15 repetitions for 1-2 sets when performing prehab or pillar (hip, core, shoulders) preparation exercises (light weight with emphasis on proper movement pattern and stability).

PROPER FORM:

When trying movements for the first time, use lighter resistance with the goal of being able to perform without breaking form. Multiple bands can be used for added resistance. Do not push through or ignore aches and pains as you perform any movement.

TRAINING DRILLS

LATERAL STRAIGHT LEG WALK

1. Stand tall with your feet hip-width apart and a Mini Band just above your knees.
2. Keeping your legs straight, walk to the side with small steps, driving your alternating elbow back with each step. Drive off of your trailing leg and step off with your lead foot.
3. Complete the set on one side before reversing direction and repeating.

TRAINING TIP:

Keep your chest up and back flat with tension on the Mini Band at all times.

FEEL IT:

Working your glutes and outer thighs.

HIP EXTERNAL ROTATION

1. Stand with your feet slightly wider than shoulder-width apart, hips back and down, back flat and a Mini Band around your legs just above the knees.
2. Keeping one leg stationary, rotate the other knee in and then back out. Keep both feet flat on the ground.
3. Complete the set on one side before repeating with the opposite leg.

TRAINING TIP:

Keep both feet flat on the ground and your stationary leg stable.

FEEL IT:

Working your glutes.

SHOULDER EXTERNAL ROTATION

1. Stand tall with one arm by your side. Loop Mini Band around straightened arm above the elbow.
2. Hold Mini Band in the opposite hand with the elbow at a 90 degree angle by your side.
3. Keep your torso and one elbow still while rotating the opposite hand away.
4. Slowly return your hand to the starting position.
5. Complete the set on one side before repeating with the other arm.

TRAINING TIP:

Keep your elbow bent as you rotate your arm outward.

FEEL IT:

Working the back of your shoulders and your rotator cuff.
