MULTI-STEP REAMERS

Clean, Bur Free Holes in Seconds!

Drillco's multi-step reamers can enlarge existing holes in steel to a new diameter or realign badly misaligned holes to allow a fastener to enter through. They are designed for use in structural steel erection, structural bolt placement, bridge construction and repair, automotive industry, and more!

Special geometry split point reduces “walking” when beginning the reaming process. This special point makes it possible to start a new hole from scratch!
