

FIG. 1. Scanning electron micrograph of a single pollen grain of *Alnus* sp. (magnification $\times 1000$).

pollen grains were collected from the same site in 1997. The pollen grains were identified as *Alnus* sp. (Fig. 1).

DISCUSSION

The pollen grains of *Alnus* sp. were collected from the same site in 1997. The pollen grains were identified as *Alnus* sp. (Fig. 1).

The pollen grains of *Alnus* sp. were collected from the same site in 1997. The pollen grains were identified as *Alnus* sp. (Fig. 1).
