

1. **Identify the components of the system.**
 2. **Define the system boundaries.**
 3. **Identify the inputs and outputs of the system.**
 4. **Identify the processes within the system.**
 5. **Identify the relationships between the components.**
 6. **Identify the constraints on the system.**
 7. **Identify the assumptions made in the analysis.**
 8. **Identify the uncertainties in the analysis.**
 9. **Identify the limitations of the analysis.**
 10. **Identify the next steps in the analysis.**
