

Lab 10: The Nervous System - Part 1: The Brain

10/10

Structure	Location	Function
Cerebrum	Front and sides	Higher brain functions, voluntary movements
Cerebellum	Back and bottom	Balance, coordination, fine motor control
Brainstem	Base of the brain	Basic life functions, reflexes
Thalamus	Center	Sensory processing, relaying information
Hypothalamus	Below thalamus	Regulates body temperature, hunger, thirst
Pituitary Gland	Below hypothalamus	Produces and releases hormones
