

install video

⚠ WARNING

Children have died or been seriously injured when gates are not securely installed.

- ALWAYS install and use gate as directed, using all required parts.
- Install according to manufacturer's instructions.
- STOP using when a child can climb over or dislodge the gate.
- Use only with the locking/latching mechanism securely engaged.
- NEVER use a gate to keep child away from pool.
- NEVER leave child unattended.
- ALWAYS close and lock the gate behind you.
- This product will not necessarily prevent all accidents. Proper adult supervision is required at all times.
- Do not use if any components are missing or damaged.
- Adult assembly required.
- Exercise care when unpacking and assembling product.
- Intended for use with children from 6 months through 24 months.
- Do not mount to spindles less than 2 in. in diameter.
- Check daily that banister brackets are securely attached and gate is securely anchored to banisters and/or wall.

Please read the following
instructions
and warnings carefully.

Keep this instruction
manual and save for
future reference.

For use with children
from 6 to 24 months.

Adult assembly required.

Keep small parts away
from children.

Components

2- curved
foam pad
for round
banisters
ONLY

Hardware

x6 x6 x1 x1 x2

wrench

Tools required (not included)

Phillips head Screwdriver

WALL MOUNT OPTION ONLY: Drill with 7/32" drill bit

WOOD MOUNT OPTION ONLY: Pre-drill with 1/8" drill bit

Maintenance

1. Regularly check spindle lock nuts and banister bracket assembly to ensure the gate is securely in place.
2. Do not use gate if any components are damaged or missing.
3. Wipe surface with a damp cloth or sponge using mild detergent and warm water.

Gate fits openings 32" to 48" (81cm to 122 cm) !

1. Hinge Assembly

CHOOSE WHICH OF THE TWO OPTIONS WITHIN THE HINGE ASSEMBLY SECTION BEST FITS YOUR NEEDS.

Option A:

Square Top Banister (No drilling necessary)

to tighten

Be sure to tighten both top and bottom bracket!
DO NOT OVERTIGHTEN!

to release

Option B:

Round Top Banister (Drilling optional)

2- curved
foam pad
for round
banisters
ONLY

Use the non-curved foam pads for
the flat surface of banister

Straps go
through
slots on
both sides
of latch

to tighten

Be sure to tighten both
top and bottom bracket!
DO NOT OVER TIGHTEN!

Option C:

Wall Mount

Pre-drill a hole using a 1/8" or 3mm.

wood wall !

or

wallboard !

Pre drill holes using 7/32" (5.5mm) drill bit. Use pre-existing holes in your banister bracket as your guide. Insert Wall Anchors into the hole with a hammer, tap gently on end until the Wall Anchor is flush with the wall.

Bolt Assembly

Insert bolts into ends of gate.

2. Gate Assembly

Support Foot Assembly:

IMPORTANT NOTE:
Adjust foot to be just touching floor when gate is locked closed.

3. Latch Assembly

SAFETY WARNING
If installing gate at top of stairs, **DO NOT** mount into wallboard.

IMPORTANT NOTE: When mounting into any wood (molding), a pre-drilled hole is required. Pre-drill a hole in the wood, using an 1/8" or 3mm drill bit approximately 1 inch deep.

IMPORTANT NOTE:
Never exceed 2.5" (6.35cm) for a gap on hinge side or bottom of gate.

IMPORTANT NOTE:
Gate can be horizontally leveled by rotating upper or lower adjustment nut (in or out) with supplied Wrench.

Latch Assembly is identical to Hinge Assembly. Choose which of the three options best fits your needs.

Square Top Banister	Round Top Banister	Wall Mounted
Repeat Assembly Option A	Repeat Assembly Option B	Repeat Assembly Option C

video de instalación

ADVERTENCIA

Se han producido muertes o lesiones graves en niños cuando las barreras no se instalan correctamente.

- Instale y use **SIEMPRE** la barrera usando todas las partes necesarias, como se indica.
- Instale según las instrucciones del fabricante.
- **DEJE** de usarla cuando un niño pueda subir o desprender la barrera.
- Use solo con el mecanismo de bloqueo/cierre firmemente acoplado.
- **NUNCA** use la barrera para mantener al niño alejado de la piscina.
- **NUNCA** deje al niño sin supervisión.
- Cierre y bloquee **SIEMPRE** la barrera detrás de usted.
- Este producto no evitará necesariamente todos los accidentes. Se requiere la supervisión de un adulto en todo momento.
- No utilice si falta algún componente o está dañada.
- Requiere el montaje hecho por un adulto.
- Tenga cuidado al desembalar y montar el producto.
- Destinado para niños de 6 a 24 meses.
- No montar en husillos de menos de 5 cm (2 in) de diámetro.
- Compruebe diariamente que los soportes de los balaustres están bien sujetos y que la barrera está bien anclada a los balaustres y/o a la pared.

Por favor, lea
atentamente las
siguientes
instrucciones y
advertencias.

Guarde este manual de
instrucciones para
referencia futura.

Para uso con niños de
6 a 24 meses.

Requiere el montaje
hecho por un adulto.

Mantenga las piezas
pequeñas fuera del
alcance de los niños.

Componentes

2 almohadilla
de espuma
curvada **SÓLO**
para balaustres
redondos

Tornillería

x6 x6 x1 x1 x2

llave

Herramientas necesarias (no incluidas)

Destornillador
de estrella

SÓLO LA OPCIÓN DE MONTAJE EN PARED: Taladro con broca de 5,5 mm (7/32 in)

SÓLO LA OPCIÓN DE MONTAJE EN PARED DE MADERA: Pretaladre con broca de 3,2 mm (1/8 in)

Mantenimiento

1. Compruebe regularmente las contratuercas del husillo y el conjunto del soporte del balaustre para asegurarse de que la barrera está bien sujeta.
2. No utilice la barrera si falta algún componente o está dañado.
3. Limpie la superficie con una esponja o paño húmedo, utilizando un detergente suave y agua tibia.

Montaje de la bisagra

Montaje de la bisagra

La barrera se adapta a aberturas de 81 cm a 122 cm (32 a 48 in) !

IMPORTANTE: Coloque la barrera en el rellano superior a una distancia de 5 cm (2 in) de la escalera superior o lo más lejos que pueda colocarse en función del tamaño y la ubicación de sus balaustres.

Montaje de la barrera

Montaje del cierre

Montaje del pie de apoyo

1. Montaje de la bisagra

ELIJA CUÁL DE LAS DOS OPCIONES DE LA SECCIÓN DE MONTAJE DE BISAGRA SE ADAPTA MEJOR A SUS NECESIDADES.

Opción A:

Balaustre con parte superior cuadrada (no es necesario taladrar)

para apretar
¡Asegúrese de apretar tanto el soporte superior como el inferior!
¡NO APIRIETE DEMASIADO!

para aflojar

Opción B:

Balaustre con parte superior redonda (perforación opcional)

Utilice las almohadillas de espuma no curvadas para la superficie plana del balaustre

para apretar

¡Asegúrese de apretar tanto el soporte superior como el inferior!
¡NO APRIETE DEMASIADO!

para aflojar

Soporte de pared

Pretaladre un agujero con una broca de 3 mm o 1/8 in.

pared de madera !

0

panel de yeso !

Pretaladre agujeros pilotos con una broca de 5,5 mm (7/32 in). Utilice como guía los agujeros preexistentes en el soporte del balaustre. Inserte los anclajes de pared en el agujero con un martillo, golpee suavemente en el extremo hasta que el anclaje de pared quede a ras con la pared.

Perno de montaje

Inserte los pernos en los extremos de la barrera.

2. Montaje de la barrera

Montaje del pie de apoyo:

NOTA IMPORTANTE: Ajuste el pie para que toque el suelo cuando la barrera esté cerrada.

3. Montaje del cierre

⚠ ADVERTENCIA DE SEGURIDAD
Si instala la barrera en la parte superior de la escalera, NO la instale en la pared.

NOTA IMPORTANTE: Cuando se monta en cualquier madera (moldura), se requiere un agujero previamente taladrado. Pretaladre un agujero en la madera con una broca de 3 mm (1/8 in) a una profundidad aproximada de 2,5 cm (1 in).

NOTA IMPORTANTE: Nunca exceda de 6,35 cm (2,5 in) de separación en el lado de las bisagras o en la parte inferior de la barrera.

NOTA IMPORTANTE: La barrera puede nivelarse horizontalmente girando la tuerca de ajuste superior o inferior (hacia dentro o hacia fuera) con la llave suministrada.

El ensamblaje del cierre es idéntico al de la bisagra. Elija cuál de las tres opciones se adapta mejor a sus necesidades.

vidéo d'installation

⚠ MISE EN GARDE

Des enfants sont morts ou ont été grièvement blessés lorsque les barrières n'étaient pas installées de façon sécuritaire.

- **TOUJOURS** installer et utiliser la barrière selon les instructions en utilisant toutes les pièces nécessaires
- Installer selon les instructions du fabricant.
- **ARRÊTER** lorsqu'un enfant peut grimper par-dessus ou déloger la barrière.
- Utiliser uniquement lorsque le mécanisme de verrouillage ou blocage est bien bloqué.
- Ne **JAMAIS** utiliser une barrière pour tenir l'enfant éloigné de la piscine.
- **NE JAMAIS** laisser l'enfant sans surveillance.
- **TOUJOURS** fermer et verrouiller la barrière derrière vous.
- Ce produit ne préviendra pas nécessairement tous les accidents. La supervision par un adulte est impérative en tout temps.
- Ne pas utiliser si des éléments sont manquants ou endommagés.
- Doit être assemblée par un adulte.
- Prendre les précautions nécessaires lors du déballage et de l'assemblage du produit.
- Conçue pour une utilisation avec des enfants de 6 à 24 mois.
- Ne pas monter sur des balustres d'un diamètre inférieur à 2 po (5,08 cm).
- Vérifier tous les jours que les supports de la balustrade sont bien fixés et que la barrière est fermement ancrée aux balustrades ou au mur.

Lire attentivement les instructions et les avertissements.

Conserver ce mode d'emploi pour toute consultation ultérieure.

Conçue pour une utilisation avec des enfants de 6 à 24 mois.

Doit être assemblée par un adulte.

Garder les petites pièces à l'écart des enfants.

Composants

Matériel de fixation

x6 x6 x1 x1 x2

clé hexagonale

Outils nécessaires (non fournis)

Tournevis cruciforme

OPTION DE FIXATION MURALE UNIQUEMENT : Percer avec une mèche de 5,5 mm (7/32 po)

OPTION DE FIXATION À DU BOIS UNIQUEMENT : Percer au préalable avec une mèche de 3 mm (1/8 po)

Entretien

1. Vérifier régulièrement les contre-écrous du balustre et le montant de la balustrade pour vous assurer que la barrière est bien en place.
2. Ne pas utiliser la barrière si des pièces sont endommagées ou manquantes.
3. Essuyer la surface avec un linge ou une éponge légèrement humectés de savon doux et d'eau tiède.

La barrière s'adapte aux ouvertures de 81 à 122 cm (32 à 48 po) !

IMPORTANT : Placer la barrière au sommet du palier à une distance de 5 cm (2 po) de la marche supérieure ou le plus loin qu'elle puisse être fixée selon la taille et l'emplacement des balustrades.

1. Montage de la charnière

CHOISIR L'OPTION LA PLUS ADAPTÉE DANS LA RUBRIQUE DE MONTAGE DE LA CHARNIÈRE.

Option A :

Balustrade avec partie supérieure carrée (perçage non requis)

pour serrer
Veiller à serrer à la fois
le support du haut et
celui du bas!
NE PAS TROP SERRER!

Option B :

Balustrade avec partie supérieure ronde (perçage facultatif)

2 supports en mousse incurvés **UNIQUEMENT** pour les balustrades avec partie supérieure ronde

clac!

Utiliser les supports en mousse non incurvés pour la surface plane de la balustrade

clac!

aligner avec le plancher!

Les sangles traversent les fentes des deux côtés du loquet

pour serrer
Veiller à serrer à la fois le support du haut et celui du bas!
NE PAS TROP SERRER!

clac!

pour débloquer

tirer!

Montage mural

Percer un trou
au préalable
avec une
mèche de
3 mm (1/8 po).

mur en bois !

ou

panneau mural !

Percer un trou au préalable avec une mèche de 5,5 mm (7/32 po). Se servir des trous existants dans le montant de la balustrade comme guide. Insérer les ancrages muraux dans le trou à l'aide d'un marteau, tapoter légèrement l'extrémité jusqu'à ce que l'ancrage mural soit au même niveau que le mur.

Montage des boulons

Insérer les boulons dans les
extrémités de la barrière.

2. Montage de la barrière

Montage du pied de support :

REMARQUE IMPORTANTE :

Ajuster le pied de support afin qu'il ne touche le sol que légèrement une fois la barrière fermée.

3. Montage du loquet

▲ MISE EN GARDE

Si la barrière est montée en haut d'un escalier, ne pas la fixer à un panneau mural.

REMARQUE IMPORTANTE :

Pour toute fixation murale à du bois (moulure), il est nécessaire de percer un trou au préalable. En utilisant une mèche de 3 mm (1/8 po), percer un trou dans le bois au préalable sur une profondeur de 2,5 cm (1 po) environ.

REMARQUE IMPORTANTE :

Ne jamais laisser un espace supérieur à 6,35 cm (2,5 po) du côté de la charnière ou en bas de la barrière.

REMARQUE IMPORTANTE :

La barrière peut être nivelée horizontalement en tournant l'écrou de réglage supérieur ou inférieur (dans le sens horaire ou anti-horaire) avec la clé fournie.

Le montage du loquet est identique au montage de la charnière. Choisir laquelle des trois options correspond le mieux aux besoins.

Balustrade avec partie supérieure carrée

Balustrade avec partie supérieure ronde

Fixation murale

Répéter les étapes décrites dans l'option A

Répéter les étapes décrites dans l'option B

Répéter les étapes décrites dans l'option C
