

1. **Introduction**

The purpose of this study is to investigate the effects of a new educational program on student performance. The program is designed to improve critical thinking and problem-solving skills through a series of interactive activities and projects.

The program is structured into several key components, each designed to engage students and foster their learning. The components include:

- Interactive Learning Modules
- Project-Based Learning
- Collaborative Group Work
- Formative and Summative Assessments

For more information, please contact the program coordinator at [email address].
