

Safety

See safety datasheet (if applicable) and product label for safety information, handling and proper use.

Directions for Use

Ensure cap is secured and invert container prior to use. FOR SEWER MAINS: Pour 2-4 gallons into manhole or drain upstream and as close to the obstruction as possible. For best results, use regularly to keep sewer main open and free flowing. FOR LATERALS: Pour 1 gallon into drain upstream and as close to the obstruction as possible. FOR DRAINS: Pour 1/2-1 quart slowly into the drain. Allow to work for 30 minutes. For difficult obstructions, a second application may be necessary. Where there is a history of obstructions, the regular use of this product at weekly intervals (or more often if required) will keep the line open and free flowing.

A true breakthrough in drain opener technology. This fast-acting product offers the performance of traditional caustic drain openers, but is biodegradable, odorless, and nonflammable. Its high density, thickened formula is heavier than water, so it sinks and clings to the blockage and begins working quickly. Highly effective against obstructions caused by fats, oils, lint and hair. It is odorless, nonflammable and safer to use than traditional drain openers.

Features & Benefits

Thickened Formula Sinks & Clings to Point of Obstruction to make sure the drain is unclogged

Highly Effective Against Fats, Oils, Lint & Hair

Odorless, Biodegradable, Nonflammable

Item Number & Unit of Measure

Item Number	HIL0112204
Unit of Measure	32 fl oz Bottle

Specifications

Color	Colorless
Appearance	Clear Liquid
Fragrance	Mild
Formula Type	Liquid
Dilution Ratio	RTU
PH	>12
Non-Volatile Matter	N/A
