CLEANING COMPANION®

**HILLYARD**  
The Cleaning Resource®

**TRIDENT®**

Better Built. Better Equipment.

# Better Built. Better Equipment.

Our Trident Brand of equipment starts from the ground up - at a place where intelligent design intersects with exceptional engineering to deliver superior cleaning equipment. Cleaning equipment that lowers your total cost of ownership, reduces your cost to clean and improves cleaning results. It's what you expect out of your equipment investment, and it's what we deliver. We're Hillyard, The Cleaning Resource, since 1907.

**Intelligent  
Design**

**Exceptional  
Engineering**

*On The Cover: CC17XP shown with optional recovery unit.*

## Low Impact Touch-Free Cleaning

The Cleaning Companion by Hillyard pioneered a new concept in touch-free cleaning with its inception in the early 2000s. By lowering pressure and reducing solution output, the Cleaning Companion changed the "more is better" perspective in the touch-free restroom cleaning world.

Less water means less chemical. Less chemical translates to a safer work environment for your staff and lower impact on your restroom fixtures and surfaces. It's a sustainable alternative that saves time and labor.

Reducing water usage minimizes the need for vacuum recovery. In daily cleaning regimens, minimizing water flow allows for microfiber alternatives to remove excess solution from the floor without the risk of re-soiling. The Cleaning Companion low-pressure platform has changed the way cleaning professionals work.

### **CC17 HP - Higher Pressure for Restorative Cleaning**

Hillyard is always working to improve restroom hygiene and touch-free cleaning processes. The Trident Cleaning Companion CC17HP, with a 300psi pressure rating at the pump, delivers high-pressure to handle tougher, more restorative cleaning jobs. The additional pressure aids in removing stubborn soils and quickly flushes soiled solution to the drain.

# Designed for Maximum Cleaning Minimal Impact

## Optimized Pressure Application

From the CC17XP's 150 psi pump to the CC17HP's 300 psi pump adequate pressure is applied to remove moderate and heavy soils without damage to grout or fixtures.

## Lower Pressure Apply Higher Pressure Rinse

Quickly change pressure at the gun. Safely apply chemical with low pressure. Rinse and remove soil with high pressure.

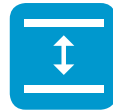

## Right Flow Rate

Environmentally preferred .050 to 0.65 gpm flow rates provide the right amount of volume to clean without wasting water.

## Compact Size

29" W x 27" D covers the total footprint including brush and squeegee accessories. Easily fit through door-ways. Minimal floor storage space required.

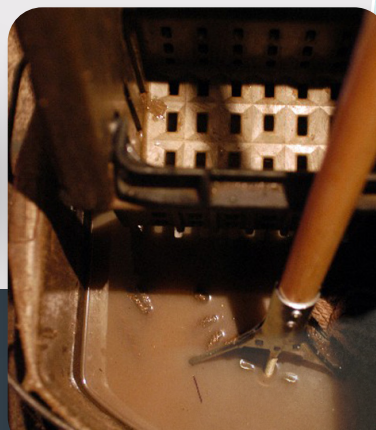

## Adjustable Storage Shelves

Maximize storage space with available adjustable shelving on the Cleaning Companion configuration without vac recovery system.

## Eliminate the Mop and Bucket

Mopping is a flawed process. Mops simply spread soil, filth and contaminants across the floor. Dip the dirty mop in soiled solution. Spread it on the floor. Wring and repeat. Cleaning Companions remove soil. It's a simple concept - clean with clean solution and remove the soiled solution - don't just "spread it around."

*Pictured: CC17XP with optional shelf configuration.*

Better Built. Better Equipment.

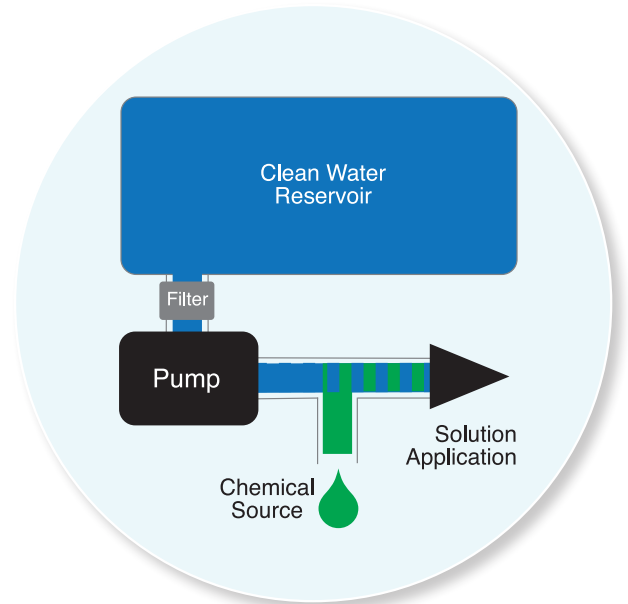

# Reliable Pump Performance

## Downstream Injection

- Cleaning chemical is injected into the water stream after the pump, extending pump life and performance.
- Downstream injection allows the user to switch from chemical application mode to rinse mode at the gun eliminating unnecessary steps to and from the base unit. Simplifies the cleaning process. Saves time. Improves productivity.

## Gravity Primed Pump Improves Performance

- The Trident CC17 takes advantage of gravity by orienting the pump under the water source, enabling the system to maintain constant prime and minimize down time.

# Safety & Accuracy

## Closed-Loop Chemical Injection

- Sealed refills with “in-the-bottle” dilution tips eliminate manual chemical mixing and exposure to concentrated chemicals. The “in-the-bottle” design also eliminates clogged tip maintenance because there is a new tip in every refill.
- “In-the-bottle” tips ensure accurate chemical dilution with every use.

## Power Options

CC17XP provides the convenience of untethered, go-anywhere cleaning when used without the optional cord-electric vac\*. Battery meter. On-board charger included.  
\*HIL30394 Power Cord required when adding Recovery Unit.

CC17XPc & CC17HP provide continuous cord-electric power, eliminating power constraints and charging issues associated with battery systems.

Sealed chemical refills are stored in the back of the Cleaning Companion.

When the application gun is activated, the water and chemical automatically mix at the specified dilution rate to deliver the proper cleaning power.

# Clean Better, Clean Faster

Ineffective manual cleaning processes are the reason restrooms continue to be the largest source of facility complaints. Restroom cleaning is hard, demoralizing work. When cleaning staffs use traditional, manual cleaning processes, they clean only the soils they see. When they do not bend over to clean hotspots like the bottoms of partitions, undersides of fixtures, and backsides of toilets, restrooms become the perfect breeding ground for odor-causing bacteria.

Cleaning Companions eliminate the bending, reaching and scrubbing associated with manual cleaning to deliver better cleaning and sanitizing to the hotspots. Clean, odor-free restrooms. Less complaints. Better ergonomics. Improved staff morale.

## Chemistry-Matched Cleaning
