

Functions

Contents

Lesson 1	Graphing Linear Equations	56
	Objective: Graph linear equations; recognize a nonlinear equation.	
	Manipulative: XY Coordinate Pegboard	
Lesson 2	Linear Functions	60
	Objective: Graph functions based on input/output coordinate pairs and determine if the function is linear or not.	
	Manipulative: XY Coordinate Pegboard	
Lesson 3	Lines in Slope-Intercept Form	64
	Objective: Given a set of ordered pairs, graph the line and write an equation for it in $y = mx + b$ form.	
	Manipulative: XY Coordinate Pegboard	
Lesson 4	Symbolic Algebra	68
	Objective: Determine the link between an algebraic equation, a corresponding table of values, and the resulting graph.	
	Manipulative: XY Coordinate Pegboard	
Lesson 5	Constructing Functions	72
	Objective: Construct a function to model a linear relationship.	
	Manipulative: XY Coordinate Pegboard
