

This diagram illustrates the structure of a plant cell. The cell is roughly rectangular with a thick cell wall. Inside, there is a large central vacuole, a nucleus with a nucleolus, and various organelles like chloroplasts and mitochondria. The diagram is labeled with various parts, though the text is too small to read.

FALCETILE

This diagram shows two different types of cells. The cell on the left is smaller and has a more rounded shape, while the cell on the right is larger and more diamond-shaped. Both cells have a central nucleus and a nucleolus. The diagram is labeled with various parts, though the text is too small to read.
