

MAINTENANCE TIPS

MAINTAINING YOUR TRANSPORT WHEELCHAIR

Proper care and maintenance is important in order to keep your DynaRide™ Transport Wheelchair in good working condition. Be sure that your chair is in proper working condition at all times. A qualified dealer or repair center (wheelchair rental dealer) should be consulted for periodic inspections and repairs.

1. At least once a week, wipe off metal parts using a clean soft cloth. If the chair is exposed to moisture, dry the chair immediately.
2. Clean the upholstery with a mild soap solution, rinse and wipe dry. Worn or torn upholstery should be replaced promptly as it may not support your body weight.
3. Inspect the wheels at least once a month. Correct any side play by loosening the lock nut on the axle, then tighten the axle just enough to remove side play.
4. Solid rubber tires require limited upkeep, but need to be cleaned periodically with a damp cloth. Solid rubber tires need to be replaced if they become cracked or severely worn.

LIMITED LIFETIME WARRANTY

Your Dynarex Product is warranted to be free of defects in materials and workmanship for the lifetime of the product for the original purchaser. This item was built to exacting standards and carefully inspected prior to shipment. This Limited Lifetime Warranty is an expression of our confidence in the materials and workmanship of our products and our assurance to the consumer of years of dependable service.

The Warranty shall not apply under the following conditions:

- Problems arising from normal wear
- Problems arising from failure to adhere to the product instructions
- Problems arising from misuse, negligence, accident or improper operation, maintenance or storage
- Problems arising from modifications or unauthorized repairs, parts or attachments
- Products where the serial number has been removed or defaced
- Problems with non-durable components, such as rubber accessories, casters, and grips, which are subject to normal wear and need periodic replacement

Dynarex shall not be liable for any consequential or incidental damages whatsoever. Dynarex shall repair or replace defective products at its option. The foregoing warranty is exclusive and in lieu of other express warranties, if any, including the implied warranties of merchantability and fitness of a particular purpose. The remedy for any violation of the implied warranty shall be limited to repair or replacement of the defective product pursuant to the terms contained herein.

If you have a question about your Dynarex device or this warranty, please contact an authorized Dynarex dealer.

*This product meets or exceeds all federal safety and environmental regulations.

DynaRide™ Transport Wheelchair

TRANSPORT WHEELCHAIRS

It is important for the attendant to be familiar with proper assisting procedures in any situation that requires the use of the DynaRide™ Transport Wheelchair. Safety is the key consideration. Consult your physician, nurse or physical therapist to determine methods most suitable for your individual needs and abilities.

Note: The Transport Wheelchair does not conform to federal standards for automobile seating and should not be used as a seat in a motor vehicle.

Note: The Transport Wheelchair should not be operated without the assistance of an attendant.

Note: You and your attendant should consult a qualified professional for correct techniques on ramp negotiations.

OPERATING TIPS

HOW TO OPERATE YOUR TRANSPORT WHEELCHAIR

Your Transport Wheelchair dealer (wheelchair rental dealer) can assist you in making adjustments and provide you with operational information.

1. To open the chair, tilt to one side and push down on seat rails.
2. Lift back support to upright position. The Lock Mechanism will engage automatically. To fold the back support, pull up on locks simultaneously, and carefully fold down the back support.
3. To attach footrests, align the holes on the footrest arm with the pegs on the frame of the Transport Wheelchair and swing the leg rest into proper position.
To remove the swing-away footrest, release the lock. Swing outward and rearward. Simply lift up and off the pegs to remove the footrest.
4. To adjust the length of the footrests, loosen the bolt (or knob) on the telescoping tube shaft. Tighten securely after adjustment. The lowest part of the footrest should not be lower than 2½ inches from the ground to permit proper clearance.

WARNING

PLEASE READ CAREFULLY BEFORE USING YOUR TRANSPORT WHEELCHAIR

Before entering or leaving the chair, engage the wheel locks against the tires on both rear wheels. Make sure the front casters are in the forward position before transferring into or out of the chair.

Do not move forward on the seat while leaning forward out of the chair. If it is absolutely necessary to do so, make sure the front casters are in the forward position. If you are picking an object up from the floor, go past the object, and then go backwards. The casters will then swing to the forward position.

Leaning out of the transport chair without proper assistance could cause tipping.

Do not step on the foot plates when transferring, as this could cause tipping.

Do not operate this wheelchair on roadways, streets or any surfaces with vehicular traffic.

Do not operate on inclines without proper assistance.

Wheelchair should be on a smooth, stable and level area with wheel locks engaged before transferring user in or out of wheelchair.

Footrest should not be lower than 2½ inches from the ground to ensure clearance.

Do not stand on or apply weight to footrests.

When trying to extend arms over back, only reach as far as your arm can extend without having to alter your seating position. Do not lean over or apply weight to the top of wheelchair back. This can cause wheelchair to tip over.

DO NOT stand on wheelchair.
