

THE BATTERY

1. The battery is the source of electrical energy.

2. It provides a steady flow of current.

3. The battery is made of several cells.

4. Each cell has two terminals.

5. The terminals are connected to the circuit.

6. The battery is used to power many devices.

7. It is a common source of energy.

8. The battery is used in many applications.

9. It is a simple and reliable source of energy.

10. The battery is used in many types of circuits.

11. It is a common component in many circuits.

12. The battery is used to power many types of devices.

13. It is a simple and reliable source of energy.

14. The battery is used in many applications.

15. It is a common source of energy.

16. The battery is used in many types of circuits.

17. It is a common component in many circuits.

18. The battery is used to power many types of devices.

19. It is a simple and reliable source of energy.

20. The battery is used in many applications.

21. It is a common source of energy.

22. The battery is used in many types of circuits.

23. It is a common component in many circuits.

24. The battery is used to power many types of devices.

25. It is a simple and reliable source of energy.
