MONITOREAL

SEE WHAT MATTERS, IGNORE WHAT DOESN'T

Video Security Assistant solution to help you enhance your offering in the ever-changing small commercial & smart home market.

Home owners and small business owners today are faced with many challenges when selecting video analytics or video doorbell solutions. Common challenges include:

- **Too many false alarms**
- **Uncertainty about cloud solution security**
- **Hidden fees to use extra features**
- **Limited analytics**

Monitoreal's video security assistant delivers AI-smart analytics that address the above concerns and more. Offering the following:

Growth Opportunity
Increasing demand for AI-powered analytics, in the small commercial & smart home segment. And an additional avenue for growth, with your existing customers.

Fast Deployment
Easy to install and moderate technical background needed. Quick set up guides and "how to" videos offered for easy installations.

Supports Most Cameras
Works with most ONVIF or RTSP compatible cameras; Along with select analog hybrid NVRs.

Highly Accurate
Greater object detection accuracy; without the constant false alarms that are typical in other systems.

100% Private
Unique solution in market - No video is processed in the cloud; all detections and alerts generated from behind the firewall.

Designed and assembled in the EU.

Why Choose Monitoreal?

## Complete your solution offering

Growing market demand

- Monetize existing customer installs as an upgrade and up-sell new customers with AI computer vision analytics add-on.
- Option to integrate with VMS using Webhooks, when needed.
- Low labor installation cost, healthy margins, easy to use interface, making this a highly profitable solution that meets a growing market need.

Avoids alerts from pixel change & motion

Object detected, even when partially obstructed

Set alerts to see unauthorized object in restricted area

Accurately identify 19+ Objects
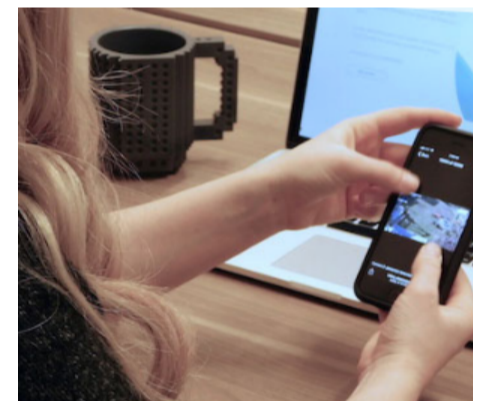

Differentiate With Quality

Compete against inferior DIY products

- Avoid being displaced by inexpensive, motion-based technology products
- Highly accurate video assistant device for Residential Properties, Small Businesses, Daycare, Vacation Properties, Nursing Homes, and more.

Always Alert

Flexible Notification Settings

- Advanced object detection allows user to set notifications from 19+ objects.
- No app installation necessary.
- Alerts can be sent via email or messenger applications such as Telegram - most commonly used, with focus on secure file transfer, delivery speed, & large file sharing capabilities.

Options to fit various applications

Two versions available
Base Model

- Security Assistant with AI-based object detection & Private notification system
- Supports up to 6 cameras and 19 analytics included

Pro Model

- Supports up to 8 cameras with faster & even more accurate object detection, perfect for busier scenarios
- Includes capacity management (Covid-19) & Deep Sight Mode features
