

# OXYGEN CYLINDERS

Dynarex Resp-O<sub>2</sub>™ Oxygen Cylinders are premium-grade containers designed to safely and effectively store liquid oxygen for use in medical facilities and homecare settings. The Cylinders are constructed from durable, yet lightweight materials (25% to 40% lighter than steel), making them easy to carry and transport. The brushed aluminum tanks feature a clear coat finish for long-lasting protection. Resp-O<sub>2</sub> Oxygen Cylinders are available in M-6 (B), M-9 (C), M-15 (D) and M-24 (E) models to meet the specific needs of a variety of patients.

- Premium-quality cylinders designed to contain liquid oxygen safely and reliably
- Lightweight construction (25%-40% lighter than steel) allows for easy portability
- Brushed aluminum with clear coat finish for optimal protection
- Standard post-valve oxygen cylinders accept CGA 870-style regulators
- Compliant with 5-year hydrostatic testing
- Ideal for medical settings and homecare use
- Ships empty; prescription for oxygen required for filling
