

The First Big Movement in More Than 50 Years

Secure Cam Lock

The Waste Master cam lock fitting provides a leak-resistant connection to the sewer outlet. Traditional RV hose bayonet fittings can leak, but industrial grade cam locks have been used in the liquid transportation industry for decades and are proven to provide a strong, reliable seal.

Tough Clean Hose

The UV-protected hose is 5 feet 6 inches compressed, 20 feet extended and features technology that keeps it extended during use to the exact length required. Resistant to abrasions and punctures, our unique hose design features an outside coil structure providing a smoother interior for better flow.

User-Friendly Nozzle

The Waste Master nozzle features an easy-grip handle with an integrated shut-off valve and a clear view port so you can see when waste has completely evacuated, helping ensure the tanks and hose are clean. Its 90 degree discharge port is easy to fit and secure into any sewage inlet.

*Hose support not included
