Marble the Clay - Squish and twist two or more clay colors together. You'll see the colors start to mix into each other. Stop squishing when you're happy with the result.
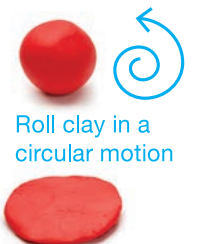

NOTE: Glow clay will not glow when marbled or mixed with other colors.

Mix New Colors - Squish two colors together. Keep squishing between your fingers until the colors are completely mixed and a new color appears.

Clay Balls & Dots - Roll small pieces of clay in a circular motion. Add a ball to your design and flatten it to make a dot.
