

THE BATTERY

1. The battery is the power source for the system.

2. It provides the energy to start the engine.

3. It provides the energy to run the electrical system.

4. It provides the energy to run the accessories.

5. It provides the energy to run the lights.

6. It provides the energy to run the horn.

7. It provides the energy to run the wipers.

8. It provides the energy to run the power windows.

9. It provides the energy to run the power locks.

10. It provides the energy to run the power mirrors.

11. It provides the energy to run the power seats.

12. It provides the energy to run the power windows.

13. It provides the energy to run the power locks.

14. It provides the energy to run the power mirrors.

15. It provides the energy to run the power seats.

16. It provides the energy to run the power windows.

17. It provides the energy to run the power locks.

18. It provides the energy to run the power mirrors.

19. It provides the energy to run the power seats.

20. It provides the energy to run the power windows.

21. It provides the energy to run the power locks.

22. It provides the energy to run the power mirrors.

23. It provides the energy to run the power seats.

24. It provides the energy to run the power windows.

25. It provides the energy to run the power locks.

26. It provides the energy to run the power mirrors.

27. It provides the energy to run the power seats.

28. It provides the energy to run the power windows.

29. It provides the energy to run the power locks.

30. It provides the energy to run the power mirrors.

31. It provides the energy to run the power seats.

32. It provides the energy to run the power windows.

DISASSEMBLY

Part No.	Part Name	QTY	Part No.	Part Name	QTY
1	Terminal Post	1	4	Terminal Nut	1
2	Terminal Washer	1	5	Terminal Washer	1
3	Terminal Nut	1	6	Terminal Washer	1

1. The terminal post is the main component of the terminal assembly.

2. The terminal nut is used to secure the terminal post to the battery terminal.

3. The terminal washer is used to provide a flat surface for the terminal nut to sit on.

4. The terminal washer is used to provide a flat surface for the terminal nut to sit on.

5. The terminal washer is used to provide a flat surface for the terminal nut to sit on.

6. The terminal washer is used to provide a flat surface for the terminal nut to sit on.

7. The terminal washer is used to provide a flat surface for the terminal nut to sit on.
