### PRODUCT SIZE CHART

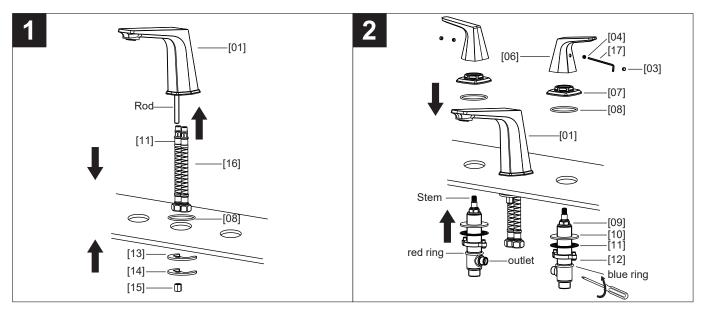

### COMPONENTS

### Before installation:

- 1.Please make sure that all components have been included.
- 2. Ensure that all supply lines are free of debris with supply stops installed.
- 3. Ensure water pressure is between 20-125 PSI.
- 4. If you are having difficulties with installation, please contact a professional plumber.

### INSTALLATION

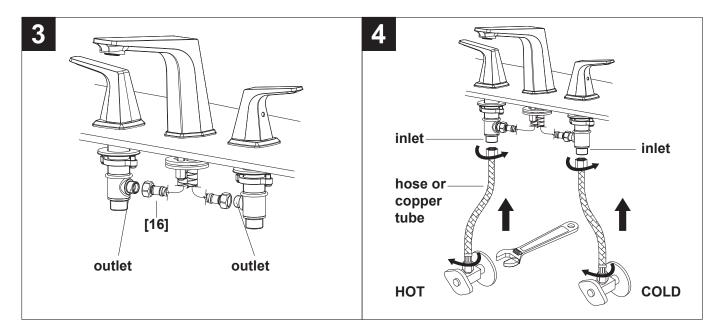

#### STEP 1:

- 1. Remove Rubber Gasket [13], Metal Gasket [14] and Lock Nut [15] from Spout [01].
- 2. Install **Hoses [16]** to the screw holes at the bottom of the **Spout [01]** and tighten the **Hoses [16]** to secure.
- 3. Slide **Hoses** [16] through **O-Ring** [08], then install **Spout** [01] with **O-Ring** [08] in faucet hole. Adjust the **Spout** [01].
- 4. Slide Rubber Gasket [13] and Metal Gasket [14] up onto the Rod of Spout [01] under sink and secure with Nut [15]. Start by hand tightening the Nut [15] first and finish tightening with T-Wrench [18] to secure.

#### STEP 2:

- 1. Slide the Valve Assembly [09] with Rubber Washer [10], Metal Washer [11] and Lock Nut [12] up through the faucet hole from underneath the sink.
  Note: The Valve Assembly [09] with red ring should be installed on the left. The other on the right.
- 2. Place the O-Ring [08] over the Valve Assembly [09] on top of the sink, then install the Handle Base [07] to the Valve Assembly [09] over the O-Ring [08]. Tighten the Handle Base [07] to secure.
- 3. Adjust each Valve Assembly [09] so its outlet is pointing at the Spout [01]. Then install the Handle [06] to the stem of the Valve Assembly [09].
- 4. Turn the left Handle [06] clockwise and the right Handle [06] counter-clockwise until they stop. If the Handle [06] doesn't align with the Handle Base [07] properly, pull up the Handle [06], turn it to the correct position and install Handle [06] again. If the Handle [06] is still misaligned, unscrew the Handle Base [07] a little bit to align with the Handle [06].
- 5. Make sure the left **Handle [06]** can't be turned in clockwise and the right **Handle [06]** can't be turned in counter-clockwise again. Then, adjust the **Valve Assembly [09]** so that the **Handles [06]** are level and the outlets point to the **Spout [01]**. Hand tighten the **Lock Nuts [12]** and tighten the screws with a screwdriver to secure. Turn the **Handles [06]** to make sure they move smoothly.
- 6. Secure the **Handles [06]** by tightening **Screws [04]** with **Allen Key [17]** and cover **Screws [04]** with **Buttons [03]**.

### INSTALLATION

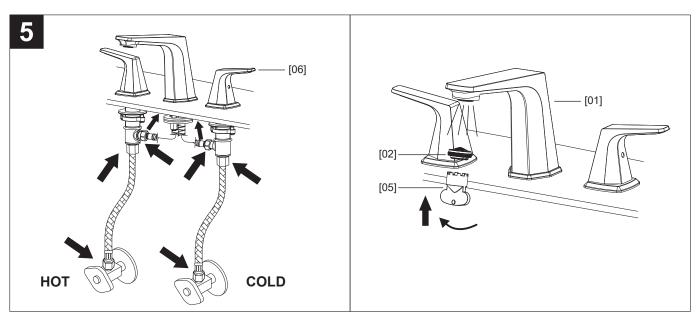

### **STEP 3:**

Connect the **Hoses [16]** to the outlets of **Valve Assembly [09]**.

### STEP 4:

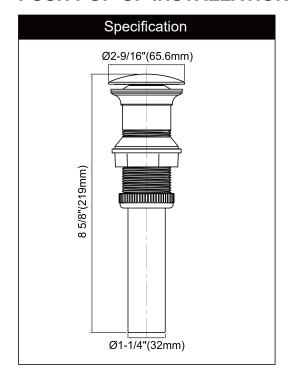

Use hoses or copper tubes(NOT PROVIDED) to connect the inlets of **Valve Assembly [09]** and the Hot and Cold water supplies. Hand tighten the nuts and tighten with wrench to secure.

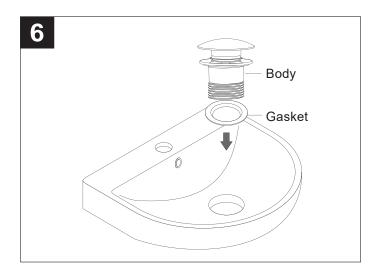

### STEP 5:

- 1. Turn on hot and cold water supplies and turn the **Handles [06]**, then check all connections at arrows for leaks. Retighten if necessary, but Do Not Overtighten.
- 2. Using the Key [05], remove Aerator [02] from Spout [01].
- 3. Turn the **Handles[06]** to full on position and flush water lines for one minute. Reinstall **Aerator [02]** with the **Key [05]**.

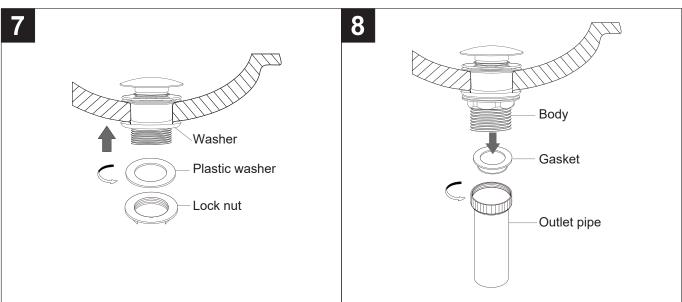

### **PUSH POP-UP INSTALLATION**

#### STEP 6:

- 1. Remove **Body** and **Gasket** from **POP-UP** drain.
- 2. Install the **Body** and **Gasket** through the drain hole of the sink as shown in Figure 6.

#### **STEP 7:**

Slide Washer, Plastic washer and Lock nut up onto the Body from under the sink and secure with Lock nut.

#### STEP 8:

Install the **Outlet pipe** with **Gasket** up onto the **Body** from under the sink and tighten it securely.

Note: Ensure there is a **Gasket** between **Body** and **Outlet pipe**.

### **CLEANING & MAINTENANCE**

- 1.To preserve the finish on the metallic parts of your ANZZI faucet, apply non-abrasive wax, such as car wax. Any cleaners should be rinsed off immediately.
- 2. Clean the aerator regularly to remove calcium build-up and any blockages that could reduce water flow.
