

The graph illustrates the growth of the workforce over time. The total number of people in the workforce increases from approximately 60 million in 1980 to 90 million in 2010. Simultaneously, the number of people aged 65 and over grows from about 10 million in 1980 to 28 million in 2010. This indicates that while the overall labor force is expanding, a significant portion of this growth is being offset by an increasing population of older individuals, which may have implications for labor market dynamics and social security systems.

LESSON 10

The graph illustrates the growth of the workforce over time. The total number of people in the workforce increases from approximately 60 million in 1980 to 90 million in 2010. Simultaneously, the number of people aged 65 and over grows from about 10 million in 1980 to 28 million in 2010. This indicates that while the overall labor force is expanding, a significant portion of this growth is being offset by an increasing population of older individuals, which may have implications for labor market dynamics and social security systems.
