

## STRUCTURE

Describe the structure

or

Part	Material	Quantity
Shell	Steel	1000 kg
Flange	Steel	500 kg
Support	Steel	200 kg

Calculate the weight of the structure

Weight of structure

Weight of structure = 1000 kg + 500 kg + 200 kg = 1700 kg

Weight of structure = 1700 kg

Weight of structure = 1700 kg

Weight of structure = 1700 kg

Weight of structure = 1700 kg

Weight of structure = 1700 kg

Weight of structure = 1700 kg

Weight of structure = 1700 kg

Weight of structure = 1700 kg

Weight of structure = 1700 kg

Weight of structure = 1700 kg
