

- The vertebral body is the largest part of the vertebra and is located anteriorly.
- The vertebral arch is the posterior part of the vertebra, which encloses the vertebral canal.
- The vertebral canal is the central canal of the vertebral column, which contains the spinal cord.
- The vertebral foramen is the opening between the superior and inferior articular processes.
- The vertebral foramen transversarium is a small opening in the transverse process.
- The spinous process is a projection from the inferior articular process.
