IMPORTANT

A) A freestanding bathtub is not designed to support weight on its rim. Therefore, do not sit or stand on the bathtub's rim.
B) Please retain this manual after installation for future reference and maintenance.
C) Installation of tub is a two-person job.

DELIVERY OF YOUR TUB

Unpack and check for damage.

Unpack the bathtub and inspect for damage or missing parts right away. Do not wait to do this. Damage reported after installation will not be covered by warranty. Repack the tub and keep it safely stored until installation begins.

Protect your tub.

Before commencing installation, ensure the tub is wholly protected and leave the covering in place until the bathroom is complete. The warranty does not cover scratches and damage incurred during installation.

⚠️ Please Note !!!

A tub waste has been supplied with this tub but it has NOT yet been installed.
Please use a qualified installer to secure it to the tub to avoid any water leaking.
Before use please test the tub to ensure the waste has been properly installed and siliconed.

TESTING THE TUB

1. Place the tub on a completely flat surface where the water may drain it after testing.

2. Close the drain and fill the tub about halfway.

3. Allow the water to stand for 30 minutes. Then inspect the drain and plumbing for any leaks.

# TEST THE BATHTUB WHILE YOU HAVE ACCESS TO THE BOTTOM AND BEFORE PERMANENT INSTALLATION.

INSTALL THE BATHTUB

Step 1
Move the tub to the selected installation location, (Make sure that the floor surface can support the load capacity), and place it in the proper (or desired) position.

Step 2
Loosen the nuts on the tub's leveling feet and adjust the feet until the tub base is 3mm above the floor, but do not tighten the nuts. The skirt cannot take the weight. See figure 1

Step 3
Use a level to ensure the tub surface is level. After adjusting the leveling feet to a suitable position, tighten the securing nuts. See figure 2
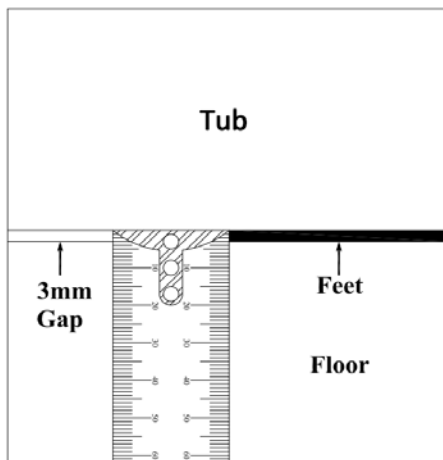

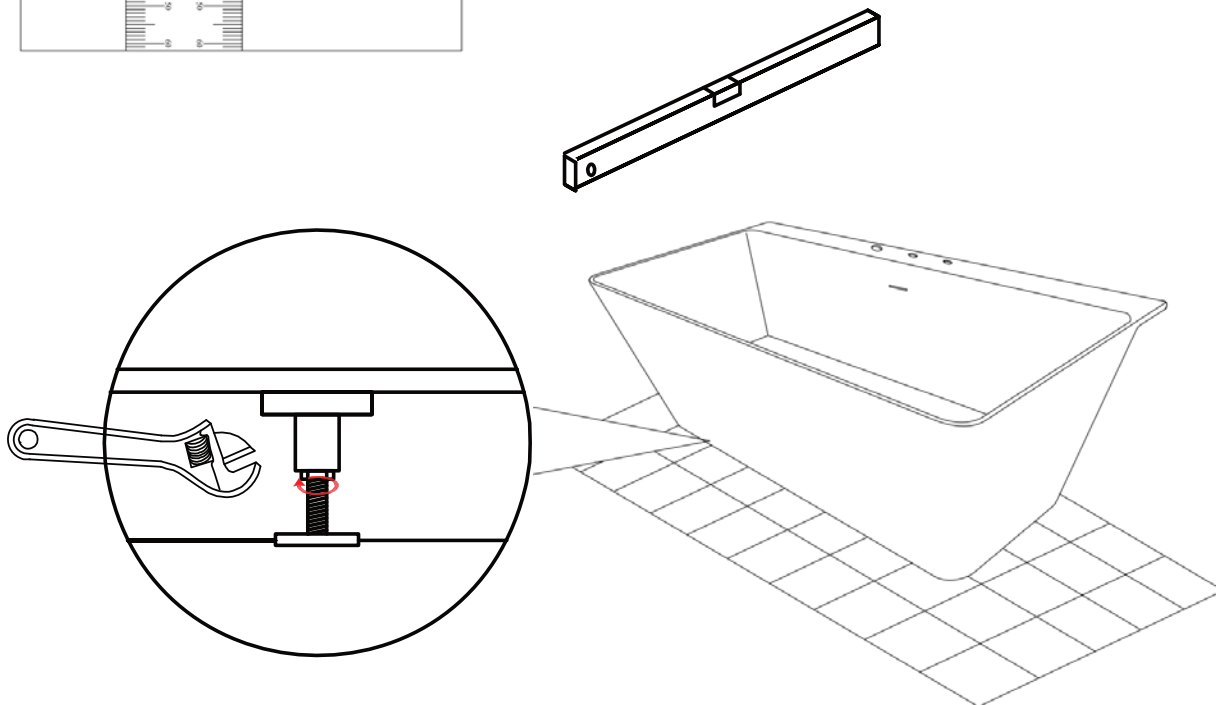

Figure 1

INSTALL THE FLEXIBLE DRAIN

a. Install the FLEXIBLE DRAIN to the drain hole under the bathtub. Make sure there is a RUBBER WASHER between the drain hole and the FLEXIBLE DRAIN. The flat surface of the RUBBER WASHER should face upward towards the drain hole. (fig 1)

b. Adjust the FLEXIBLE DRAIN so that it points to the location of the drain pipe in the floor. Tighten the Nuts to secure the FLEXIBLE DRAIN. DO NOT OVER TIGHTEN. (fig 2)

c. Block the outlet of the FLEXIBLE DRAIN and water test the connections by filling the tub with water to the overflow opening. Check for water leakage at areas indicated by arrows. (fig 2)

ASSEMBLE THE FAUCET

Following the deck mounted faucet installation instructions, install the faucet to the tub. Then check for leaks, making sure there are no leaks at any of the connections. Caulk around the faucet after it is fully installed.

INSTALL VANITY COVERS-(this step is competely optional)

1. Determine the distance between vanity covers A and B according to faucet pipework position.
2. Attach the vanity covers A and B using silicone caulk (make sure the caulk is fully cured before tub is used) or mount the covers to the wall with the supplied screws.
3. Push the tub to the desired position, making sure the faucet pipes are hidden inside the vanity covers.

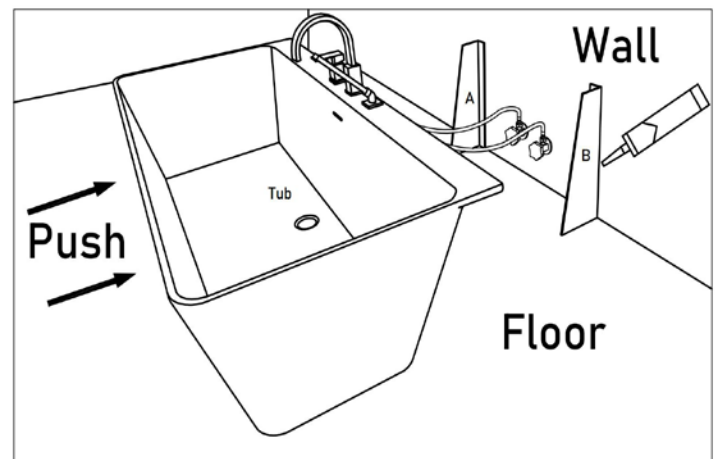

POSITION THE TUB

Before positioning the tub, make sure the ground is completely flat. Next, place the tub over the intended installation area. Lastly, insert the drain through the drain hole in the floor. See the Figure below.

CLEANING AND MAINTENANCE

1. To preserve the polished surface, after using your tub, clean with soft cloth and warm soapy water to wash away any body oils or soap residue that forms a ring mark.

2. Do not use powders, pastes, cream cleaners, thinners, window cleaning sprays or dry cleaning liquid, etc., to clean the tub.

3. To clean the overflow plate and pop up drain, we do NOT recommend you use any household cleaners. Strong chemical cleaners can damage the finish and affect the function of this product. The product should only be cleaned with soapy water and rinsed with clean water and dried with a soft colth.

4. When colored essentials oils are used, first test that the color won't stain your tub. Always add oils into a tub full of water. Never pour them directly into an empty tub.
