

# Soil Gone

# 20C1

## Booster - proteinaceous soils

Concentrated compound for removal of organic soils such as grass, blood, food and biological waste soils from fabrics without the need for chlorine bleach.

### Features & Benefits

- Contains surfactants, enzymes and optical brighteners to promote whiter whites and brighter colors
- Removes stains without chlorine bleach
- Non-phosphated
- It works particularly well on polyester, nylon and spandex fabrics commonly used in athletic uniforms as well as on cotton and polyester fabrics used in healthcare and foodservice facilities
- Can also be added to the wash cycle to help remove heavy stains in the wash process

### Applications

- For use on most fabrics
- It is designed to be used in low water temperatures, ambient to 110°F (43°C)

# Clax<sup>®</sup> Soil Gone

Booster - proteinaceous soils

## Use instructions

- Dosing level is dependent on wash classification
- Consult your Diversey representative for more information
- This product is designed to be manually dispensed into a sink or plastic container for soaking fabrics

## For Soaking:

- Add 4 oz per 10 gal. (120 g / 38 L) of warm water (110°F / 43°C)
- Allow to soak for a minimum of 30 minutes
- Badly stained items may require overnight soaking
- After soaking period, do not dry items, place immediately in washer and run through standard wash formula
- Soil Gone presoak can also be added to the wash cycle to help remove heavy stains in the wash process
- If used in the wash bath, do not add bleach in the same bath
- Soil Gone presoak can be used in commercial and homestyle washers

Technical data	Clax <sup>®</sup> Soil Gone
Certifications	Kosher
