Water and drain requirements		
Water supply	$\frac{1}{2}$ " copper line, $\frac{1}{2}$ " NPT female thread	
Steam line	$\frac{3}{4}$ " copper line, $\frac{3}{4}$ " NPT female thread	
Pressure relief valve	3/4" NPT female thread, valve supplied	
Drain line	1/2" copper line, $1/2$ " NPT female thread	

Dedicated circuit required	
Generator: S-1200	12KW, 240V, 50A

## **Installation Notes**

Install this product according to the installation guide. Factory sized: L x H x W = cubic feet. Choose the appropriate model. For every foot of ceiling height over 8 ft use the next larger steam unit. Always round your measurements up. Wall material is irrelevant.

For this steam generator, do not exceed the maximum volume rating:

Steam generator model	Power rating	Maximum volume rating
Steam generator moder	1 ower rating	volume rating
Generator: S-1200	12KW	450cu ft
