Why Choose Dahle?

Recent events have made shredding confidential information a necessity. Documents found in the trash are not legally protected so they're fair game to individuals looking to find out more information about you and your business. This explains the rapid increase in identity theft and industrial espionage. Federal security laws require that medical and financial institutions as well as business owners must prop-

erly safeguard their client's personal information. What's the best way to dispose of this information? Shred it with a Dahle Professional Shredder.

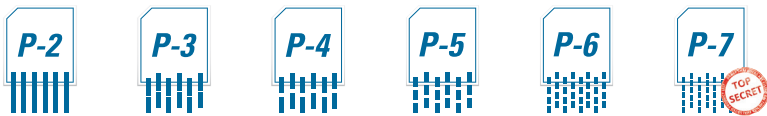

Dahle shredders are carefully engineered in Germany by Novus Dahle GmbH using the latest technology and finest materials. Each component is manufactured and assembled with precision from 90 years of experi-

ence. Dahle shredders feature cutting cylinders that are guaranteed to last a lifetime. Other components such as rubber shock mounts, electronic sensors, and a thermally protected motor produce a quality machine and peace of mind in knowing your Dahle shredder will provide many years of trouble-free operation.

Security Levels

Under the international DIN 66399 standard, Dahle offers six security levels for document destruction. Each increase in security level represents a smaller particle (shred) size. A shredder with a greater security level will offer a lower sheet capacity compared to a lesser security model. Be sure to understand your company's security requirements before making a selection.

Document Security Levels

Digital Media Security Levels

Document Shredders

Secure information should never fall into the wrong hands. Dahle shredders are your best line of defense in preventing unauthorized access to secure information. Whether it's personal credit card statements or top secret government documents, Dahle has a shredder that will meet your needs.

Security Levels

Trimmers + Cutters

Whether you're trimming a single sheet of paper or a stack of 700, Dahle paper cutters will give you the results you desire. Our blades have a self-sharpening precision graduated edge which gives you the ability to shave the smallest piece from the edge of your paper. These results are achieved from over 90 years of cutting and sharpening experience.
