

The diagram shows a central circle with a vertical line through it. From the top and bottom of this line, two lines extend outwards to the corners, forming a diamond shape. This represents a molecular structure, possibly a diamond crystal lattice unit cell or a specific molecular geometry.

## FACTFILE

The diagram shows a central circle with a vertical line through it. From the top and bottom of this line, two lines extend outwards to the corners, forming a diamond shape. This represents a molecular structure.
