

Medicine for the Common

Medicine for the Common is a community of people who believe in medicine that is accessible and comprehensive for the most vulnerable people in our society.

The drive for better working conditions and better remuneration for those providing social services is a consequence of our political, social, moral, cultural and religious values. It is a duty of our society to ensure the survival of people dependent on care.

In the event of a future conflict in the economy we shall continue to be a sector that is.

Our strategy will be to work with the state to ensure that the social sector is sustainable in the long term. We consider that we should be able to provide services that are of high quality and that are accessible to all. We will continue to work with the state to ensure that the social sector is sustainable in the long term.

If you have a question about the drive for better working conditions and better remuneration for those providing social services, please contact us.
