Dynarex Tubular Elastic Bandages are designed to provide secure and comfortable dressing retention without the need for adhesives, offering breathable and flexible support. Ideal for hard-to-bandage areas and frequent dressing changes.

- Ideal for hard-to-bandage areas such as elbows, knees, and shoulders
- Breathable fabric provides airflow for enhanced patient comfort
- Elastic construction conforms to body contours for a secure, comfortable fit
- Soft material is gentle on fragile skin, ideal for repeated dressing changes
- Tape-free design reduces skin irritation and facilitates quick, easy dressing changes
- Customizable length for versatile use across various medical applications
- Reusable for single-patient applications
- Not made with natural rubber latex
