ANXIETY

Anxiety is a common mental health condition characterized by excessive worry, nervousness, and fear. It can significantly impact your quality of life if left untreated.

Symptoms of anxiety include:

- Excessive worrying about everyday things
- Feeling nervous or on edge
- Racing thoughts
- Difficulty concentrating
- Irritability
- Restlessness
- Fatigue
- Headaches
- Muscle tension
- Sweating
- Blurred vision
- Increased heart rate
- Dizziness
- Shortness of breath
- Hot flashes or chills
- Stomach issues
- Insomnia
- Depression

If you experience these symptoms, it's important to seek professional help. A healthcare provider can help you determine the cause of your anxiety and recommend appropriate treatment options, such as therapy, medication, or lifestyle changes.
