Thank you for purchasing the W59412 12' Professional Hand Tool Planogram. This program was designed to utilize the valuable space in your store the most efficient way possible.

Enclosed in this packet you will find:

- Color photo of Planogram
- Numerical Listing Sheet by Section
- Breakdown Schematic of the Product Layout
- Insert Cards for Scan Tag Hooks

We recommend placing bars first starting bottom up, the aisle violator arms then the hooks and perforated scan tags before setting product. Please be sure to position hooks and product before locking the hooks onto the bars. This will help ensure that even spacing is achieved as quickly as possible. Please also be advised that the bar height is for reference only, as you may have to adjust them slightly for your particular display space.

The aisle violator hardware is designed to draw attention to this assortment from anywhere in the aisle. To utilize the aisle violators:

1. Place the set screw in the hole in the base of the arm, and hand thread the oval-shaped stop on the end of the screw.
2. Insert the stop into the appropriate upper slot in the Lozier upright, while inserting the bottom tab of the aisle violator base in a lower slot.
3. Hold the aisle violator in place and tighten the set screw. The stop attached to the set screw should wedge itself inside the Lozier and allow you to fully tighten it until the aisle violator is securely in place.
4. Remove the adhesive backing from the clear sign holder and apply to the outward extended end of the aisle violator arm.
5. Repeat for all 4 aisle violators before attaching the signs.

If you have any questions on this program, or any other product inquiries, please do not hesitate to call.

Thank you for your business!
