- Phillips screwdriver
- Level
- Mounting hardware (provided)

UNPACKING THE GAME

After unpacking the game, it is important to save the original box, all packing material, and the receipt. These items will be needed if it ever proves necessary to return the game for service.

MOUNTING (PHYSICAL INSTALLATION)

Two methods for mounting the dartboard are available.

1. Use the keyhole slots on the backside of the dartboard. Follow the illustration and mount the dartboard. The two screws are screwed into the wall until the screw head is 3/8" away from the wall. The dartboard is positioned so the two screw heads are inside the keyhole. Slide the dartboard down to secure. The head of the screw that is used must be larger than 1/4" and smaller than 3/8".
2. Four equally spaced holes are accessible from the front to drive in screws. With the dartboard held in place, four screws are driven in from the front, through the existing holes. Use 1/8" diameter screws. The head of the screw must fit inside the pocket.

Wall Anchors

A wall with studs is the most common type of wall to mount the dartboard.

1. Locate a stud and use wood screws or sheet metal type screws to secure the dartboard.
2. If a stud cannot be located or is not in the proper location, use an anchor that is suitable for the type of wall.

Some common anchors are:

Plastic - Drill a snug hole in drywall and push the anchor in up to the head. When the screw is screwed into the anchor, the plastic will expand, locking the anchor in place. Do not use on thin panelling.

Toggle Bolt - Drill hole through wall. Hole must be large enough for the wings to pass through. Insert screw through the holes in the dartboard and thread the toggle wings just onto the screw. Fold the wings back and push through the hole until the wings spring open. Pull back on the screw to hold wings against the inside of the wall and tighten screw.

Hollow wall anchor - Drill a snug hole through the wall. Tap anchor into the hole until the prongs on the underside of the head are seated securely into the wall. Turn screw in and apply pressure to keep the anchor head from turning. Tighten screw until resistance is felt. Do not over tighten. Turn screw out to remove. Anchor will stay and screw can be replaced.

Other methods are available. Consult a hardware store if questions arise.

Mounting Using the Keyhole Slots

Refer to the illustrations on the following pages.

1. Choose a location that is near an electrical outlet and has at least 10 feet of open floor space in front of the board. Locate and use a wall stud for mounting whenever possible.
2. Locate studs and use wood screws or sheet metal screws to secure the dartboard if the mark is on the stud. The head of the screw must be smaller than 3/8" and larger than 1/4".
3. Determine the location for the dartboard. Place a mark on the wall 68 inches (172.7 cm) from the floor. This mark is the final position of the center of the dartboard (bullseye).
4. If the mark is not over a stud, use the mounting hardware that came with your dartboard.
5. Measure 8-5/8" (21.9 cm) directly up from the bullseye mark and place a mark on the wall. Then measure down 8-5/8" (21.9 cm) from the bullseye mark and place a mark on the wall. Use a level to check that all marks are vertical.
6. Drill pilot holes at the two marks. These are for the mounting screws.
7. If using wall anchors, follow the instructions under Wall Anchors on page 5.
8. Insert screws into anchors until a 1/4" (6.5 mm) gap is left between the wall and the screw head.
9. Hold the dartboard so the two screw heads fit into the lower part of the keyholes. The dartboard should slide down 1/2 inch and the screw heads will hold it on the wall.
10. Screws can be tightened or loosened to provide a secure mounting.

Mounting Using the Four Holes From the Front

Refer to the illustrations on the following pages.

1. Choose a location that is near an electrical outlet and has at least 10 feet of open floor space in front of the board. Locate and use a wall stud for mounting whenever possible.
2. Two people are needed for this step. Hold board on the wall. Position center of bullseye 68" from the floor. Level the board. Hold in place.
3. Locate the four mounting holes on the front of the board. Use a marker or nail to mark the position of the board through the four mounting holes onto the wall. Remove the board.
4. Drill four pilot holes on the marks created in Step 3.
5. If using plastic anchors: drill the holes so the anchors fit snugly. Push anchors into place.
6. Line up dartboard over anchors. Screw board into place. The screws will expand the anchors.

Create the Toe Line

Place a toe line 96" from the face of the board for the throwing distance. Adhesive tape or masking tape, 2' long by 2-1/2" wide, may be used. GLD products offers a Viper Throwing Line and a Dart Mat for this purpose. Refer to the parts order form (page 55) at the back of this manual.

Four holes for front mounting. Use #10 screw, 5/16" max. head diameter.

POWER INSTALLATION

The dartboard is designed to be powered by 3 AA batteries (not provided) or by an AC to 5V DC, 1000 milliamp (minimum) adapter, with the DC plug polarity configured as positive (+) outside, and negative (-) center. To connect the adapter, plug the DC plug into the DC power jack on the dartboard and the AC plug into an electrical outlet.

- Always install the correct size and grade of battery suitable for the intended use.
- Replace all batteries of a set at the same time, taking care not to mix old and new ones, or batteries of different types.
- Clean the battery contacts and also those of the device prior to battery installation.
- Ensure the batteries are installed correctly with regard to polarity (+and -).
- Remove batteries from equipment which is not to be used for an extended period of time.
- Remove used batteries promptly.

If batteries are installed when the external power supply is plugged in, the dartboard turns off. To turn the dartboard back on, remove the batteries and the power cord. Plug either the power cord OR the batteries into the dartboard.

CAUTION: The power adapter is not a battery charging device.
Do not plug in the power adapter when the dartboard is turned on.
Remove all the batteries before plugging in the power supply.

1. The board is not intended for children under the age of 12 years old.
2. The board must only be used with the recommended transformer.
3. The transformer is not a toy.
4. Disconnect the dartboard from the transformer before cleaning.

PROTECTIVE FILM

This electronic dartboard has a clear protective film over the entire display and button area to prevent scratching during shipping. It is recommended that you remove this film for easier reading of the display. To remove, simply lift edge, peel off and discard.

WARNING: Not for use by children without adult supervision.
Darts are not toys and may cause injury if used improperly. Everyone must stand behind the dart thrower.

IMPORTANT NOTES

1. During shipping or in the course of normal play, it is possible for scoring segments of this board to become temporarily jammed, resulting in a “frozen” board. If this occurs, the built-in **Self Diagnostic Function** of the e-BOARD Computer will be activated automatically. Your dartboard will run a self-test routine to determine which segment is stuck. An error message will flash on the display together with the number for the “Frozen” segment.

Error Code	Malfunction
Err 83	Stuck ON/OFF Button
Err 84	Stuck Page Up Button
Err 85	Stuck Enter Button
Err 86	Stuck Page Down Button
Err 87	Stuck Volume Control Button
Err 88	Stuck Quick 301/Handicap Button
Err 89	Stuck Miss/Reset Button
Err 90	Stuck Bounce Out/Amend Button
Err 91	Stuck Language Button
Err 92	Stuck Next Player Button
Err ≡ XX	A segment is stuck, the ≡ indicates a triple and XX indicates the number of the segment.
Err = XX	A segment is stuck, the = indicates a double and XX indicates the number of the segment.
Err _ XX	A segment is stuck, the _ indicates a single and XX indicates the number of the segment.

- a. Find the “frozen” segment according to the display.
 - b. Press firmly down on the “frozen” segment until it breaks free and the loose fit is restored. Once the “frozen” segments are loosened, the error message should be gone and the board will continue to operate normally.
2. This game is designed for use with 1" maximum length soft-tip darts only! Never use metal tipped darts or longer soft-tip darts on this dartboard! Metal tipped darts will seriously damage the circuitry, the e-BOARD computer, and electronic operation of the dartboard.
 3. Electronic and mechanical reaction time is required between shots. If two shots occur too close together, pull out second dart and rethrow to properly record your score.
 4. If using an AC adapter, it must be 5V DC 1000 milliamp. The plug polarity is configured as positive (+) outside, and negative (-) center. **Using the wrong adapter may cause electrical shock and damage to the unit.**
 5. Do not use excessive force when throwing darts. Throwing a dart too hard will cause frequent tip breakage and cause excessive wear on the board.
 6. Do not spill liquids on the dartboard. Do not use spray cleaners that contain ammonia or other harsh chemicals, as they may damage the dartboard. Instead, we suggest regular dusting with a damp cloth. Make sure the game is unplugged and use a mild detergent and a damp cloth for more vigorous cleaning.

7. This game is for indoor use only.

Helpful Tip: To prevent dart tips from loosening, twist the dart to the right (clockwise when pulling it from the board. This motion will make dart removal easier and will prolong the life of your dart tips.

They can then throw a dart to select the next target. That number and segment then becomes the target. The scoreboard will display the target. In any turn if the player does not hit the designated target they loose one life.
- If a player hits the target with the first or second dart, the next dart then determines the next target and that players turn is over.
