

RAPID REPAIR TECHNOLOGY SYSTEM

MUSTANG SURVIVAL WE SAVE LIVES FOR A LIVING

The Sentinel Series Dry Suits take advantage of Mustang's Rapid Repair Technology™ which enables users to self-replace neck, socks and wrist seals in an hour or less, as well as repair minor leaks in the dry suit shell while in the field on deployment.

The system consists of tool kit components including an iron & jigs allowing for the replacement of the seals. The Complete Tool Kit RE0001-02 includes everything the user requires except for the actual replacement seals. These are ordered separately to meet your operational requirements.

This system works with all current MSD576 & Sentinel Series Drysuits.

	SEAL PART	DESCRIPTION	STANDARD W/ SUIT SIZE
TOOL KITS	RE0001-02	Tool Kit Complete: Iron, Neck (disk), Wrist & Sock (arch)
