

CONTENTS

- 2 Foil designs (adhesive-backed)
 - 4 Paints (0.3 fl oz / 9 ml each)
 - Wiggly eyes
- contents may vary

IMPORTANT

- **This non-toxic paint dries permanently on most surfaces - paint may stain.** Clean up paint while it's still wet.
- Cover work area. Wear old clothes. • Ask for adult permission before displaying window art.
- Use only on glass surfaces as recommended • Designs may fade over time. • Remove paint or adhesive residue with window cleaner (adults only).

DIRECTIONS

Plan out your designs before you begin. For best results, lightly fill in each section with paint. You can add more color as needed while paint is still wet. Use all four paint colors in your design. **Using too much of a single color is not recommended.** If you do run out, try mixing in another color to fill. You can use the tip of your nozzle to blend and pop any air bubbles as needed. Use the nozzle tip to spread the paint. Cover inside edges so paint touches the foam and forms a seal. Wipe any paint off the foil design. Lay flat to dry for about 24 hours.

WIGGLY EYES

Paint must be completely dry. Attach the wiggly eyes using a dot of paint. Press them into place. Set them aside to dry.

DISPLAY

When completely dry, gently peel foil design from plastic and place on your window. If designs do not peel easily, they need more drying time.
