

1. **Introduction:** This report discusses the findings of a survey conducted among students regarding their preferences for online learning platforms. The survey aimed to identify the most popular and effective platforms used by students and to understand their reasons for choosing them.

2. **Methodology:** The survey was conducted using an online questionnaire distributed through social media and email. A total of 100 students participated in the survey. The questionnaire included questions about the frequency of use, preferred features, and reasons for choosing a particular platform.

Platform	Frequency of Use	Preferred Features	Reasons for Choosing
Canvas LMS	High	Interactive content, mobile access	Easy to use, integrates with other tools
FutureLearn	Medium	Discussion forums, video lectures	Engaging content, good support
Blackboard	Low	Traditional LMS features	Reliable, stable platform
Moodle	Low	Customizable, open-source	Flexibility, cost-effective

## CONCLUSIONS

3. **Findings:** The results of the survey indicate that Canvas LMS is the most popular platform among students, followed by FutureLearn. Blackboard and Moodle are less frequently used. The most preferred features across all platforms were interactive content and mobile access. Students cited ease of use and integration with other tools as the primary reasons for choosing their preferred platform.

4. **Recommendations:** Based on the findings, it is recommended that institutions continue to invest in Canvas LMS and FutureLearn to enhance the online learning experience. Additionally, providing training and support for students to utilize the features of these platforms effectively would be beneficial.
