

How to Store Toilet Paper

Remove the lid, lean the product to the side, and put in toilet paper rolls one at a time, each row at a time.

Make sure that they are neat and organized.

※Sometimes due to the shape and weight of the toilet paper, or the way that it was stored, or the way it came down, the roll may change in shape, or get stuck and not come down. If this happens, reach for it and pull it down from the bottom, or open the lid and unstick it.

INSTRUCTIONS

Thank you for purchasing this item from Yamazaki USA Inc. Please refer to the following instructions before using the product. Please use it properly, and take good care of it.

CAUTION

- ※The following actions may result in the product, falling, turning over, being damaged, changing shape or color, or acquiring dents. Please take care to follow the points below.
- Do not use the product for anything other than its intended use.
 - Avoid placing the product on unsteady surfaces; choose flat surfaces instead.
 - Please set up the product with care, so that neither it nor the surface dents or scratches.
 - While moving the product, do so gently to ensure it does not dent or scratch.
 - There may be times when the product cannot be used due to the size and shape of the toilet paper roll.
 - Do not exceed the weight capacity of the product as it may break or change shape.
- Even within the acceptable parameters, a large shock may cause the product to fall, so be careful.
- Do not place the product in direct sunlight or where it may be exposed to high temperatures.

HOW TO CARE FOR.

- When the product gets dirty or wet, wipe it with a dry cloth and make sure that it dries thoroughly. If the product stays wet for long periods of time, it may cause rust.
- Do not soak the product in water.
- Avoid using thinner benzine and bleach, as they will damage the product.

Product Size W13×D4.9×H18.9 inch / W33xD12.5xH48 cm
